

AJAY BABU DHANYASI

Senior Data Platform Engineer | Cloud Native | AI Solutions | Terraform | LLMs

📞 6302425628 @ajayexams7@gmail.com [Ajay Dhanyasi | LinkedIn](#) [Medium](#) 📍 Bangalore

SUMMARY

Senior Data Platform Engineer with 5+ years expertise in scalable cloud-native data infrastructure. Proficient in **Python, SQL, PySpark, Apache Airflow, Kafka, Terraform**, and cloud platforms (**AWS, GCP**). Specialized in **real-time** data pipelines, modern data warehousing (**BigQuery, Snowflake, Databricks**), infrastructure cost optimization (**20% savings**), data quality management, and AI/LLM solutions (**Claude, Vertex AI**).

EXPERIENCE

Senior Data Platform Engineer

Saltmine

📅 06/2026 - Present 📍 Bangalore, India

- Architected real-time data ingestion pipeline with **Kafka** and **Debezium**, delivering **1M+** daily records with **<10 min SLA**, enabling real-time analytics and reducing reporting latency by **95%**
- Refactored PySpark DataFrame** operations and complex SQL transformations, leveraging **Catalyst optimizer** and reducing stage count by **40%**, which reduced file processing time by **30%** for enterprise-scale data pipelines.
- Reduced Terraform** infrastructure drift and migrated production services from AWS Singapore (ap-southeast-1) to Mumbai (ap-south-1), improving developer accessibility and infrastructure efficiency while reducing AWS infrastructure costs by **20%**.

Senior Data Engineer

Castlight Health

📅 06/2024 - 03/2026 📍 Hyderābād, India

- Led the migration of a project from **Pub/Sub**, which was causing data loss, to **Airflow on Kubernetes**, designing the solution with minimal code changes to preserve existing processes, achieving a **30%** reduction in resource usage and company billing.
- Built Grafana dashboards for real-time monitoring of Apache Airflow Kubernetes clusters, enabling the team to **optimize resource allocation** and reduce infrastructure costs by **20%**.
- Developed optimized logic for **detecting and preventing duplicate file** processing for files up to **1TB**, reducing detection time by **90%** and improving pipeline performance and reliability.
- Modernized data processing pipelines by replacing legacy Python loops and **Pandas with Polars**, cutting memory usage by **60%** and improving code reliability to **100%**.

Data Engineer

Roboxautomation

📅 08/2022 - 06/2024 📍 Hyderābād, India

- Spearheaded the creation of databases and designed Entity-Relationship (**ER**) diagrams, overseeing **ETL** operations to establish a robust foundation for efficient data management across multiple projects.
- Automated data cleansing** to boost data processing speed by **30%** and reduce code complexity by **40%**, significantly enhancing data accuracy and project efficiency.

Data Engineer

Tata Consultancy Services

📅 08/2021 - 08/2022 📍 Hyderābād, India

- Developed Python scripts to optimize critical modules, reducing manual processes by **40%** and enhancing operational efficiency.
- Built a comprehensive **ERP** system using **Django and MySQL**, customized for the fashion industry to optimize data management and streamline operational workflows.

SKILLS

Python	SQL	ETL/ELT/ETLT	AWS
Django	PySpark	GCP	Big query
Airflow	terraform	Docker	API
Kubernetes	Snowflake	Databricks	
GIT	Kafka	SQS	RAGS MCP
Linux	Glue	Data Fusion	Pub/Sub
CI/CD	hudi	Vertex AI	Claude
Agents	Dataflow	Grafana	CDC
redshift	lambda	jenkins	LLM
unity catalog	Data Lake	Langchain	

KEY ACHIEVEMENTS

💎 **Qualified in Data science paper in GATE**

Cleared Gate 2025,2024,2022,2021 in Data science and artificial intelligence

VOLUNTEERING

Technical writer

Medium

Voluntary technical knowledge sharing through authored articles with real-world, real-time engineering insights.

Open-source contributor

GitHub

Demonstrated commitment to the open-source community to projects like Apache Airflow, Google APIs.

CERTIFICATION

Claude with vertex AI & Bedrock

Anthropic

Data science by Fractal Analytics

Coursera

EDUCATION

B.TECH (ECE)

Jawaharlal Nehru Technological University

📅 08/2017 - 05/2021
